

Senior Business Analyst

INTRODUCTION

She is a Senior Business Analyst at Dynaworx (Pty) Ltd, South Africa. She has a delivery track record in various industries from the financial sector, through to the health, mining, insurance and training sectors. Over the years she has been part of a wide variety of diverse projects, giving her the skills to quickly and easily adapt to the different environments.

She has been part of the successful transformation of the FNB Online platform and maintaining and developing new products across various business areas. She furthered her web application skills by joining the dynamic Vitality team, later the ABSA Online Banking team as well as the Global Markets team at Standard Bank to create their Research Portal.

She was a critical resource in the RFI process for the People Team Project at Hollard which focused on sourcing a new HR system. For the Anglo-American project, she stretched her skills to focus on the infrastructure, networking and system requirements when a mine site is expanding or a new site is developed.

At WesBank she had the opportunity to form part of the CAS project team to develop the end-to-end solution for the Acquisition and Management of all Corporate Business within WesBank. After that she joined Standard Bank for the ambitious SAP Core Banking Transformation project focusing on the Credit, Client Onboarding and Compliance value streams. She then received a sought after opportunity to join the JSE and collaborate across the multiple business areas on BAU (business as usual) initiatives. It gave her the opportunity to work on Corporate Actions – specifically the implementation of issuing new stock exchanges with their ISIN nr; Surveillance, Compliance and the RFP (request for proposal) for the earmarked HR system. For the last 2 years she has been with Nedbank Card, focusing on two Acquisition projects (Malawi and Zimbabwe) as well as small initiatives with in the Card PI space.

She has a thorough understanding, knowledge and experience of the SDLC and implementation of projects across various methodologies which include Agile, Waterfall or a combination of the two (Hybrid). Part of her responsibilities were to guide and mentor junior colleagues and assist in upskilling. She was an assistant lecturer in Delphi at the University of Pretoria during her Honors year and later years, lectured the Business Analysis diploma at FTI on a part time basis. She has a passion for mentoring and guiding younger novices to grow themselves both personally and in their work skills.

She has an Honors Degree in BCom Informatics and also majored in Statistics and Organisational Psychology and Psychometrics (Honors level)

Thank you for the opportunity!
